

- Standard enclosures
- Corrosion resistance
- Customer-tailored solutions

This series features control, signalling and display units fitted into stainless steel standard enclosures. The enclosures are certified for use in Zone 1/21 and Zone 2/22. The equipment is highly corrosion resistant due to high quality stainless steel grades. Either plastic or metal glands are used for electrical connection. On request, BARTEC will equip the enclosures with corresponding control, signalling and display units and cable glands and supply the required labels.
